MP100 | WEB DEVELOPMENT PROJECT STATEMENT

Title: Project 4

Semester/Year: Fall 2019

Coding language/software: Atom

Description (3-4 sentences giving the person looking at your work insight into your creative and technical process. For example: What is your website about? What was the most challenging part of the project and how did you solve it? etc.): My website is about candy and unicorns/fairies because it reminded me of how we as kids never wanted to eat our veggies, but instead a bunch of candy and also how we had an imagination about such things as fairies and unicorns at some point and I thought it'd be fun but cute to create something that would take us back to that feeling of feeling like a kid again. As for this project, the most challenging part was inserting images to my pages because for some reason either they would disappear out of nowhere or would show up blank. To solve it i just followed the steps that were located on the google slide from class and from there followed the <img scr= format, etc.
